Claims 1 to 4 are pending.

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Specification***

2. The title of the invention is not adequately descriptive. A new title is required that is more clearly indicative of the invention to which the claims are directed. One possible title would be -- Magnetic Recording/Reproducing Device Including A Tape Pull-Out Member Having a Projection For Contacting A Ramp Surface --.
3. The abstract of the disclosure is objected to because it is unclear whether the ramp surface and first surface are the same surface.

***Claim Rejections - 35 USC § 112***

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Line 22, "the first surface" lacks adequately clear antecedent basis. Is the first surface the same surface as "a ramp surface"?

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2627

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Azai (U.S. 2003/0156348). Azai discloses a tape pull out member 10 with a projection portion 15 that contacts a ramp 23 and the resultant forces between elements 15 and 23 will include forces acting in a direction from the ramp surface towards the projection. Note figures 2a, 2b, 4, 5a, 5b, 6a, and 6b in particular.

#### ***Allowable Subject Matter***

7. Claims 2 to 4 are allowed.
